TECHNICAL DATA

Weight	4.1 kg (9 lbs)
Dimensions	L = 420 mm (16.5") W = 160 mm (6") H = 250 mm (10")
Strap tension	0–1800 N, fully variable
Sealing	with seals
Seal magazine	for 40 seals
PLASTIC STRAP	
Strap quality	Polypropylene PP Polyester PET
Strap width	12–13, 16 mm ($\frac{1}{2}$ ", $\frac{5}{8}$ ")
Strap thickness	Polypropylene 0.50–0.70 mm (.020"–.028") Strap width 13 mm ($\frac{1}{2}$ "): 0.50–0.80 mm (.020"–.031") Polyester 0.50–0.70 mm (.020"–.028")

SEALS

Strap width 13 mm	CMP 464
Strap width 16 mm	CMP 564

GENERAL INFORMATION

These operating instructions are intended to simplify familiarisation with the strapping tool and the ways in which it may be used for the intended purpose. The operating instructions contain important information concerning the safe, proper and efficient use of the strapping tool. Compliance with the instructions will help to avoid danger, reduce repairs and stoppages and increase the reliability and service life of the strapping tool.

The operating instructions must always be available at the place of operation of the strapping tool. They must be read and observed by all persons concerned with work on the strapping tool. This work specifically includes operation, refilling of operating material, fault elimination and maintenance.

In addition to the operating instructions and the regulations for accident prevention effective in the country of use and place of application, the recognised technical regulations for safety and proper working must also be observed.

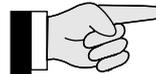

CAUTION!

Used where there is danger to life and health.

WARNING!

Used for danger which can cause material damage.

NOTE!

Used for general information and information which, if not followed, can cause faults in the operating sequence.

2.1 INFORMATION ON ENVIRONMENTAL PROTECTION

This tool is manufactured without any physical or chemical substances which could be dangerous to health. For disposal of all the parts, the governmental instructions must be observed.

2.2 CLEANING THE TOOL

The tool should be regularly cleaned and lubricated. Any particles of straps sticking in the tension wheel can be cleaned with the supplied steel brush.

Little oil between the jaws and on the sliding surfaces of the aluminium housing is sufficient.

3

SAFETY INSTRUCTIONS

Inform yourself!
Read the operating instructions carefully.

Use for the intended purpose

The tool is intended for strapping packages, pallet loads etc.

This tool was designed and manufactured for safe handling during the strapping operation.

Protect yourself!
When operating the tool, wear eye, face and hand protection (cut-proof gloves).

The tool processes plastic straps only (polypropylene and polyester).

Possible misuse

The use of steel straps is not possible.

Warning:
Strap will snap forward!
When cutting the strap, hold the upper portion and stand safely away from the strap.
Caution:
The lower strap will snap forward.

Warning:
Strap could break!
Do not stand in line with the strap while it is tensioned. The strap could break!

Caution:
Danger of squeezing!
Do not put your fingers into the tension wheel area.

Caution:
Only strap packed goods!
Do not put hands or other parts of the body between the strap and the package during the strapping process.

Original ORGAPACK seals must be used exclusively.

Original ORGAPACK spare parts must be used exclusively!
Not using original spare parts will dissolve the warranty and the liability.

4

DESCRIPTION

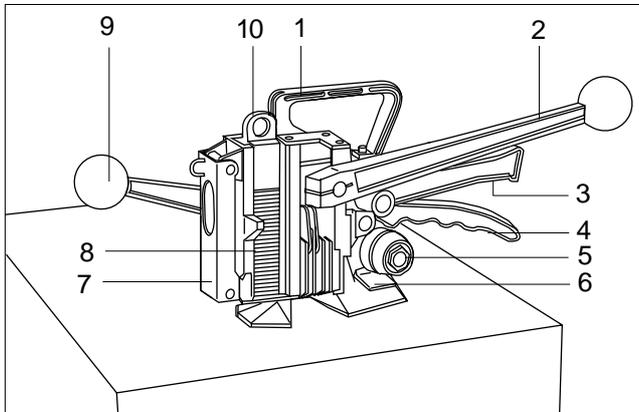

Fig. 1

4.1 DESIGN

- 1 Carrying handle
- 2 Sealing lever
- 3 Handle
- 4 Rocker lever
- 5 Tension wheel
- 6 Tension plug
- 7 Seal support
- 8 Seal magazine
- 9 Tension lever
- 10 Seal weight block

4.2 FUNCTION

- Cramping of strap through toothed plate (2/5).
- Tensioning by feed wheel principle (2/4).
- Feeding of seal (2/1) out of seal magazine.
- Sealing by notching (2/2) the seal.
- Strap cut with knife (2/3).

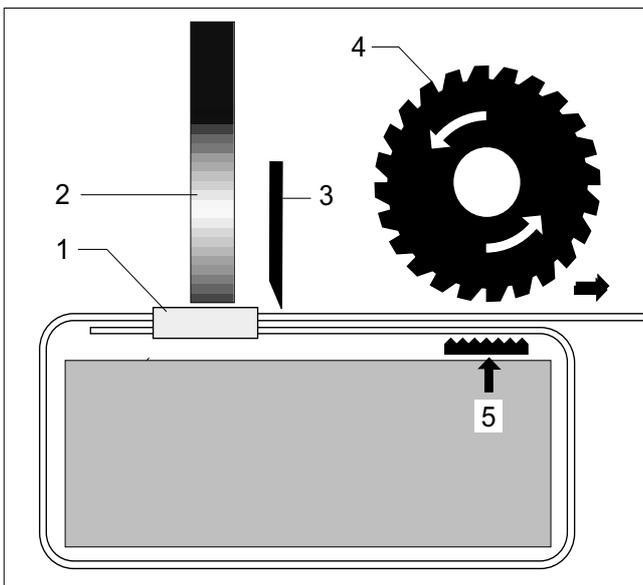

Fig. 2

5

OPERATING INSTRUCTIONS

5.1 REFILLING SEALS

- Pull out and fold back the seal weight block. Refill the magazine with a new stack of seals, so that the short part of the seals looks towards the open side of the magazine. Pull out the seal wire. Replace the seal weight block on top on the seals.
- If the sealing device is empty, the sealing lever must be operated once, so that one seal get pushed into the sealing mechanism.

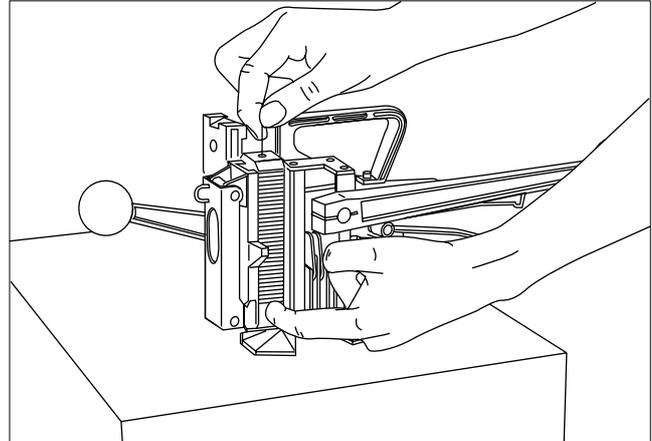

Fig. 3

5.2 OPERATING THE TOOL

- Place strap firm around the package and hold it with the left hand so that the lower strap start (4/1) is approx. 20 cm (8") away from the hand. The index finger lies between the two straps.
- Grip the tool with the right hand and lift the rocker lever towards the handle.
- Slide both straps into the tool until the stop is reached, the lower strap start must be below the seal magazine. Guide the straps with the index finger so that the tension plug is positioned between the two straps.
- Release the rocker lever.

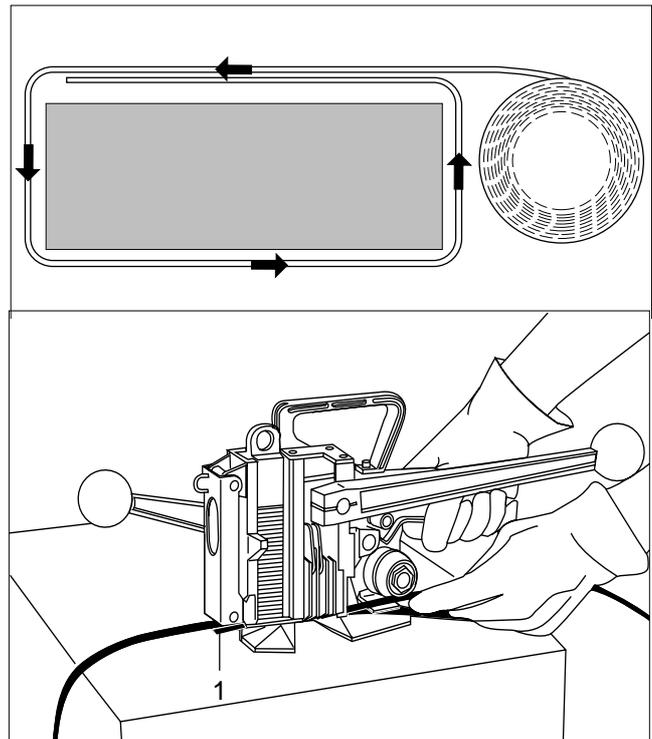

Fig. 4

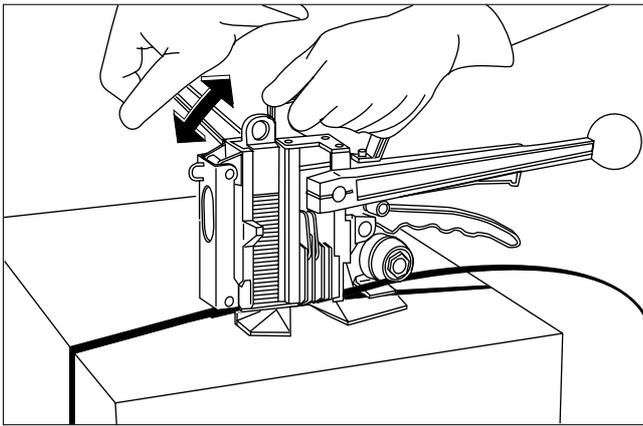

Fig. 5

- Hold the tool with the left hand by the carrying handle and move the tension lever with the right hand back- and forward until the desired strap tension is reached.

Adjustment of maximum strap tension, see Chapter 6.1 (only CM 61 DK with double clutch).

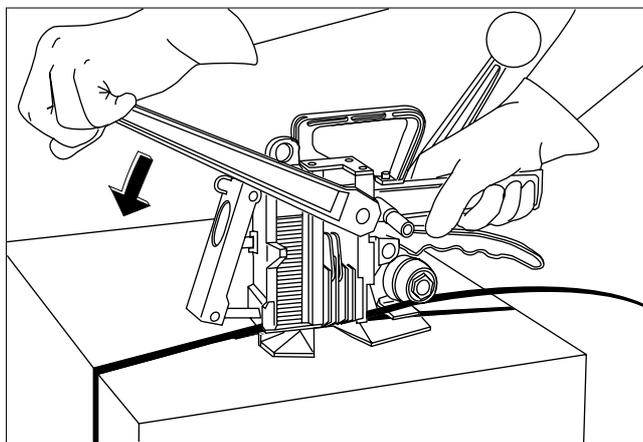

Fig. 6

- Grip the tool on the handle with the right hand and press the sealing lever with the left hand forward until the stop is reached.
- Pull back the lever.

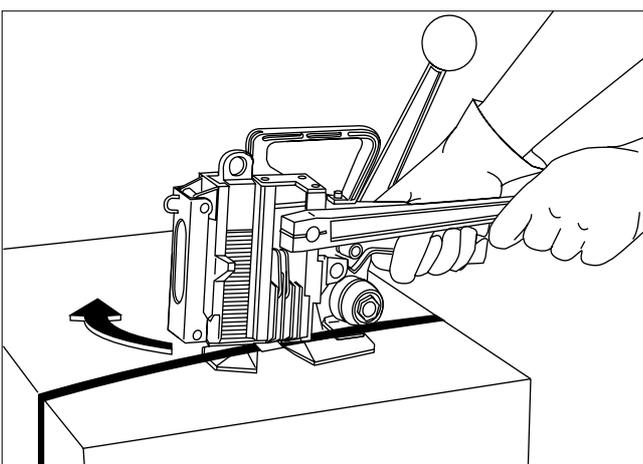

Fig. 7

- Pull the rocker lever towards the handle with the right hand and swivel the tool away to the right of the strap.

Check of seal

To obtain the maximum seal efficiency, the notches have to be cut properly into the seal.

An incorrect sealed strapping cannot secure the package and can thus lead to injuries.

6

PREVENTIVE AND CORRECTIVE MAINTENANCE

6.1 ADJUSTING STRAPTENSION

The maximum strap tension is determined by the adjustment of the friction clutch. For this reason a fork wrench is supplied.

- Block the tension shaft with a fork wrench (SW 11). With other fork wrench (SW 17) adjust the nut (8/1).
- Turning the nut in clockwise direction the strap tension is increased. Turning the nut in counter-clockwise direction the strap tension is reduced.

Best results are achieved by adjusting the clutch to the maximum tension for the package being strapped. But not tight that the tension wheel will turn over or the strap breaks.

Do not oil the friction clutch!

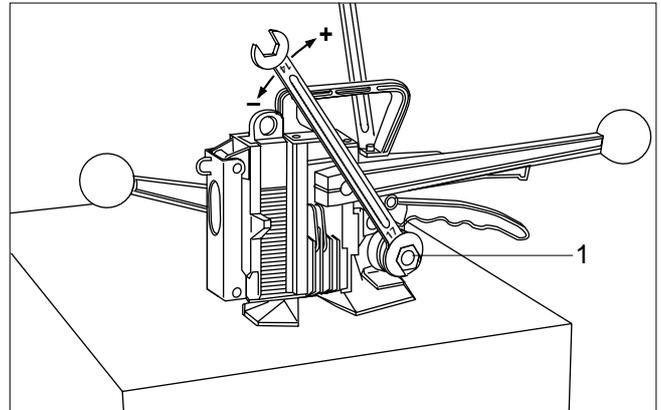

Fig. 8

6.2 SETTING CUT-OFF DEPTH

When correctly adjusted the upper strap will be cut through without damaging the lower strap.

- Turning the screw (9/1) in clockwise direction, the cutting will be increased, turning counter-clockwise the cut-off depth is reduced.

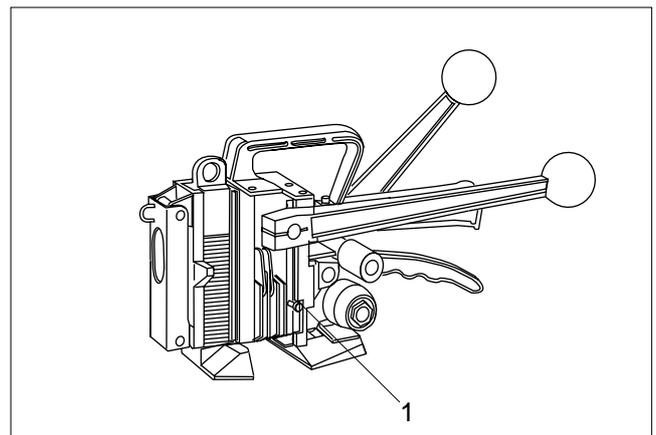

Fig. 9

6.3 REPLACING CUTTER KNIFE

Removal

- Remove seals from seal magazine.
- Remove two screws (10/5).
- Remove two screws (10/4).
- Remove seal housing (10/1) and seal guide (10/9).
- Remove jaw package (10/2).
- Remove two counter sunk screws (10/3).
- Remove two retaining rings (10/6) and remove guide link (10/7).
- Remove and replace cutter knife (10/8).

Installation

- Install the parts in reverse order. When installing jaw package, observe that the torsion spring (page 24, pos. 106) is positioned underneath the counter sunk screw.

		Parts for suspension for horizontal working	
	2172.600.038	Suspension link	1
	1911.005.128	Cylinder screw, M 5 x 12	2
		Parts for double clutch 13 mm ($\frac{1}{2}$") + 16 mm ($\frac{5}{8}$"), (DK)	
201	2173.900.032	Tension shaft	1
202	1830.000.304	Carrier disc	1
203	1830.000.302	Clutch disc	1
204	1820.040.091	Tension wheel	1
34	1830.000.262	Clutch disc	1
206	1830.000.303	Carrier	1
207	1925.210.162	Saucer spring, \varnothing 16,3	5
208	1917.803.106	Washer, M 10	1
209	1916.333.102	Lock nut, M 10 x 1.25	1
218	1830.000.062	Key	1
		Parts for direct drive 13 mm ($\frac{1}{2}$") + 16 mm ($\frac{5}{8}$"), (DA)	
218	1830.000.062	Key	2
228	2173.900.008	Tension shaft	1
229	1820.040.047	Tension wheel	1
230	1820.020.194	Spacer bushing	1
231	1920.112.132	Retaining ring, \varnothing 12	1
		Parts for steel baseplate	
	2172.700.026	Base plate	1
	1911.906.258	Counter sunk screw, M 6 x 25	1
	1916.006.088	Nut, M 6	1
	1911.905.162	Counter sunk screw, M 5 x 16 13 mm ($\frac{1}{2}$ ")	1
	1911.905.202	Counter sunk screw, M 5 x 20 16 mm ($\frac{5}{8}$ ")	1
	1911.005.128	Cylinder screw, M 5 x 12	1

* LOCTITE 480

DK = Double clutch DA = Direkt drive CM 61 DK / CM 61 DA
