AQ Automatic Quad Drive

series overview

The BestPack® AQ series are operator-free, carton-sealing machines designed to meet the needs of uniform in-line carton closure applications.

The units are four belt driven (two side and two top), driven by three electric 110V UL approved motors. The four belts allow for more stability and the sealing of more rugged applications. The AQ series carton sealers are designed with a four column support structure.

All systems incorporate our exclusive pop out pressure sensitive "High Speed" tape heads with patented tab adjustment.
