

tesa® Splicing Tapes

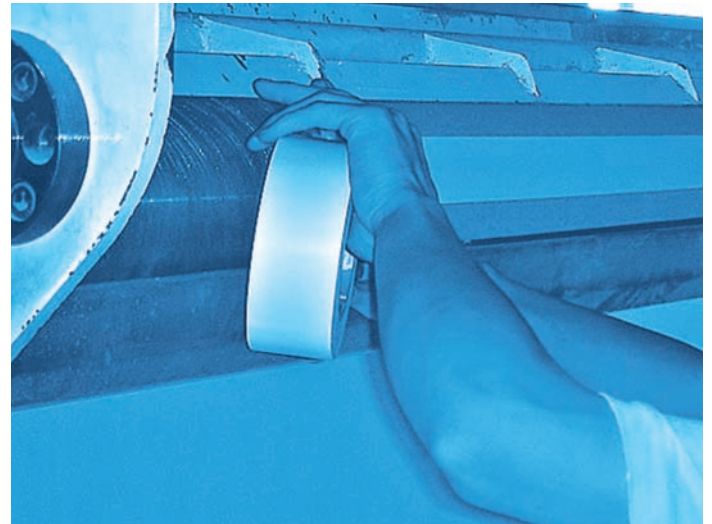

The Best Choice to Increase Efficiency for Corrugated Board Production Processes

The profitability in corrugated board production depends on the reliability and efficiency of the production process. tesa offers two specially designed tape solutions engineered to meet the various demands of corrugated board producers. Leading companies worldwide confirm the high quality and recommend tesa® Splicing Tapes in daily operations.

Production manufacturers alike understand that splice failures lead to unnecessary costs. Machine downtime, additional labor, and material waste result in unprofitable and costly delays. tesa® Splicing Tapes have proven to reduce costs by ensuring the highest splice security, even at speeds of 400 m/minute (1313 ft/minute), or during prolonged periods of time in the heating segments.

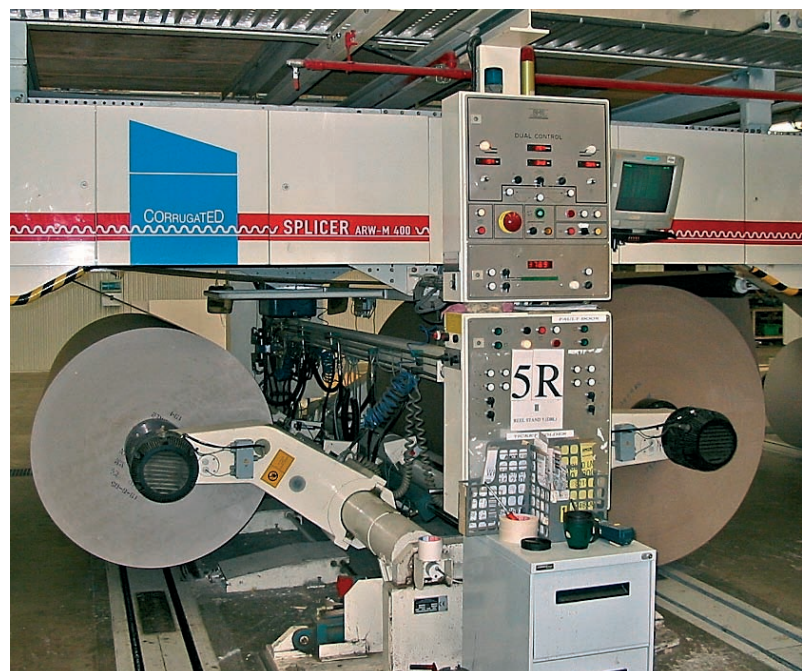

To meet different customer requirements, look to the tesa corrugated board splicing assortment: **tesa® 50658** and **tesa® 50605**.

tesa® 50658 is the ideal choice for the most demanding corrugated splices. This high-performance splicing tape features an elevated temperature resistance and performs exceptionally well, guaranteeing outstanding splice performance for all your single, double, and multi-wall corrugated splicing needs. **tesa® 50605** is a performance-grade splicing tape ideal for less demanding corrugated splicing jobs.

Features of tesa® Corrugated Splicing Tapes

- Consistent, reliable splice performance
- Acrylic adhesive features high tack and high shear
- High temperature resistance
- Good bond on rough surfaces

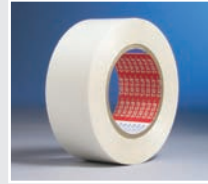

Product Description

tesa® 50658

tesa® 50605

Thickness (mils)	4.6	3.7
Length / width	50m x 25mm, 38mm, 50mm, 60mm, 75mm	50m x 38mm, 50mm, 60mm, 75mm
Backing	tissue	tissue
Color	transparent	transparent
Liner	silicone-coated paper; yellow	silicone-coated paper; white
Adhesive	acrylic	acrylic
Adhesion Values (oz/in)	49	41
