tesa® Solutions for Extrusions and Molded Profiles

ASSORTMENT FOLDER
tesa – Adding value to your products

As one of the leading producers of pressure-sensitive adhesive tapes, tesa provides solutions for a wide range of applications.

Our sales team offers total support, including customized tape recommendations, as well as individual assistance on your production processes. In particular, we offer a host of double-sided tapes that are perfect accompaniments for attaching molded and extruded parts.

Self-adhesive trims and profiles are the perfect choice for numerous applications.

*PVC - Polyvinyl Chloride
Make your profile a ready-to-use component!

Self-adhesive components outperform other fastening methods, such as nails, screws, staples, liquid glue, or clips in many respects. This helps save time and money because of less quality complaints, simple design processes, and efficient assembly.

Adhesive tape gives benefits to your customers:

- **Good optical appearance**
  - No glue residues; no cheap looking staples or screws; thin constructive gap

- **High design flexibility**
  - Combine many different material types (including glass and mirror); implement design changes quickly and efficiently

- **Simplify your component design**
  - Avoid expensive tongue-and-groove joint profiles; no additional drilling processes

- **Higher production output**
  - Short set-up and clean-up time; fast and reliable assembly; no additional process steps

- **Simple and reliable mounting process**

- **Clean production environment**
  - No smell and little waste during assembly

- **No material breaks at the drill hole**
  - Non-destructive technology; distribution of tension along the bond

- **No component detachment at temperature peaks**
  - Foam backing compensates for different thermal elongation of materials

- **Reliable bonding performance**

---

Customer Solutions:

- **White and Black Foam**
- **Clear and Black Films**
- **Short and Long-length Rolls and Spools**
- **Variety of Tape Thicknesses**

---

The right tape for your application:

- **Wide assortment of mounting tapes for your requirements**
- **Individual application testing and tape recommendation**

Efficient production process:

- **High-quality cross-wound spools**
- **Tape dispenser assortment and engineering service**
tesa® Spool-wound Tapes

tesa® double-sided, spool-wound tape rolls are long, traverse-wound rolls containing up to 30,000 uninterrupted feet of tape (up to 98,000 feet for single-sided tape).

The impressive results are across-the-board savings – in time, labor, and money.

In a nutshell:

One spool-wound roll of tesa® double-sided tape

= higher productivity
= improved quality
= less scrap
= lower overall costs

---

tesa® Integrated Spool Dispensing Equipment

**tesa® 6084 Spool Dispenser**

- Unwind tape from spools in a controlled way; guide the tape precisely without damage to the lamination unit
- Easy operation and little set-up time translate into efficient processes
- The reliable taping process has been proven at many customers worldwide
- Can be used with single or double-sided tapes

**tesa® 6081 Spool Dispenser**

- All the functionality of tesa® 6084, plus...
- Unique brake/buffer system to compensate for variations in line speeds
- Can be used with single or double-sided tapes

**tesa® 6098 Dispenser and Laminator**

- All the functionality of tesa® 6084, plus...
- Embedded lamination station
- Ideal for unique product shapes and sizes
- Can be used with single or double-sided tapes

---

tesa - Professional Tape Technology

For over a century, tesa has pioneered the development of pressure-sensitive adhesive tape technologies. This rich tradition of innovation dates back to 1882 when the company’s founder patented a method for manufacturing medical adhesive dressings. Today, the worldwide tesa enterprise services customers in over 100 countries around the globe and holds numerous product patents. At tesa, our charter is to provide our customers with service levels and applications expertise that go well beyond the roll of tape.

tesa® products prove their impressive quality day in, day out in demanding conditions and are regularly subjected to strict controls. All information and recommendations are provided to the best of our knowledge on the basis of our practical experience. Nevertheless, tesa can make no warranties, expressed or implied, including, but not limited to any implied warranty of merchantability or fitness for a particular purpose. The user, therefore, is responsible for determining whether the tesa® product is fit for a particular purpose and suitable for the user’s method of application. If you are in any doubt, our technical support staff will be glad to advise you.
