# Keep it simple with Airmove

Using only 1 product for protection and cushioning, Airmove will save space in warehouses and enhance professional packages for transport.

## Advantages

- Whether large, fragile or heavy, any product can be packed, quickly and safely

- Forget cumbersome handling with loose fill or packing paper

- Only one product is needed to provide both protection and padding

- Save time, reduce stress

- Gain more space and convenience

- Ready for immediate use

## Device Settings

- **Air Fill Rate**: By means of the air supply, you can regulate just how much your air cushions should be filled.

- **Sealed Temperature**: Temperature can be regulated so that your cushions will be properly sealed, and your products will reach their destination safely.
