## AirSpeed® Ascent™

### High-pressure Air Cushioning System

Pregis AirSpeed® Ascent™ is a premium high-pressure air cushioning system that produces Pregis AirSpeed® Hybrid Cushioning (HC) for the highest level of product protection. HC's proprietary square pattern provides more surface area and superior cushioning compared to competitive products.

This high-performance, compact system helps increase throughput and creates consistent, premium protection.

#### Enhanced Reliability

- Patented seal technology – superior inflation ensures consistent cushioning
- No wearable parts for more uptime
- Pressurized film for improved cushioning

#### Packer-Centric Operation

- Load and go!
- Designed to protect packers, no exposed parts
- User-friendly interface – start-stop operation
- Eliminates variability and human error

#### Improved Performance

- Smart logic identifies film and optimizes system settings
- Up to 100 FPM throughput for high-volume operations

**Size:** 19" x 16" x 23"

**Weight:** 31 lbs.

## HC

### Hybrid Cushioning

Pregis AirSpeed® Hybrid Cushioning (HC) proprietary square pattern provides a premium aesthetic and more surface area to absorb shock for the highest level of product protection. HC inflates on-demand, saving space and reducing shipping costs compared to traditional bubble. All HC film blends are How2Recycle® designated for store drop-off recycling.

#### Applications

Cushioning | Wrapping | Blocking and Bracing |  
Extended Ship Cycle Packaging

Ultimate  
protection

Sustainability

Customer  
experience

HC's proprietary square pattern provides more surface area to absorb shock providing superior product protection.
